Abattoir Gallery is pleased to present *New Work by Natalie Petrosky*, an exhibition of recent paintings by the artist. Petrosky's work is characterized by her use of vintage patterned fabric collaged into mosaic-like configurations. She draws from a variety of source material often rooted in folklore, most recently incorporating images from retro coloring books of Greek mythology. Petrosky likens her practice to working in a garden; a meditative act of collecting, clipping, and attempting to tame the unpredictable forces at work in her painting process.
